TRAINING INFO

Many basketball programs take hours of free play and call them "instruction." But we understand that parents are enrolling their kids to **SPECIFICALLY IMPROVE** his or her basketball skills. That's why our coaches not only focus on **mastering the fundamentals** but also on increasing **advance skill set** and developing **great basketball IQ**. Athletes who are well rounded in all these areas have the keys to a successful season.

All youth will receive a pre and post evaluation to identify their individual needs so that our coaches can effectively increase their skill, develop them based on their individual needs and advise parents on what their child need to excel further.

We also tackle those immaterial aspects that every great athlete must have such as a **positive attitude**, **discipline**, **patience**, **respect** and **team work**.

KEYS TO SUCCESS

While sports are great extracurricular activities for youth, our coaches understand that many athletes can **BENEFIT** from the financial and educational opportunities that being a great athlete can afford them. Our program is set up to, in addition to developing your child's skills, help guide parents and athletes toward **future financial and educational opportunities, networks and resources**.
